DANIEL PIZARRO SAAVEDRA

Backend Developer – .NET Specialist

Barrie, Ontario, Canada

Email: Saavedra.Alejandro@outlook.com

Phone: +1 647 408 8501

LinkedIn: linkedin.com/in/daniel-pizarro-saavedra

PROFESSIONAL SUMMARY

Backend Developer with 5+ years of experience building enterprise applications using C Sharp, .NET Core, ASP.NET Core, and SQL Server. Strong focus on API development, data intensive systems, ETL pipelines, and performance optimization. Skilled in clean architecture, SOLID principles, and scalable backend services. Proven results improving system efficiency by 30 percent and reducing data processing time by 25 percent. Currently completing a Canadian Computer Programming Diploma with emphasis on cloud ready development and industry standards.

CORE COMPETENCIES

- Backend Development
- API Design and Optimization
- Database Performance Tuning
- ETL Pipelines
- Clean Architecture
- SOLID Principles
- Distributed Systems (conceptual)
- CI CD Collaboration
- Agile Scrum

TECHNICAL SKILLS

Backend Technologies: C Sharp, .NET Core, ASP.NET Core, Entity Framework Core, LINQ, RESTful APIs

Databases: SQL Server, Query Optimization, MongoDB, Firebase Realtime Database

Tools and DevOps: GitHub, Azure DevOps, Postman, Visual Studio, UiPath RPA

Frontend: JavaScript, React.js, Node.js, Express.js

Software Engineering: Object Oriented Programming, SOLID, Clean Architecture, ETL, Agile Scrum

WORK EXPERIENCE

Software Developer – Ingenieria y Construccion Sigdo Koppers – Santiago, Chile – 2018-01 to 2023-04

- Developed and maintained backend services using .NET Core and ASP.NET Core, improving operational efficiency by 30 percent.
- Designed and optimized RESTful APIs for enterprise systems, improving interoperability and reducing response times.
- Improved SQL Server performance through indexing, query tuning, and stored procedures for high volume workloads.
- Optimized ETL pipelines, reducing data processing time by 25 percent and improving data accuracy.
- Implemented clean architecture and SOLID principles to increase maintainability and scalability.
- Collaborated with QA, DevOps, and business teams to deliver enterprise features aligned with requirements.
- Performed performance tuning, debugging, and root cause analysis to improve system stability.
- Participated in code reviews, documentation, and continuous improvement initiatives within Agile Scrum teams.

EDUCATION

Computer Programming Diploma – Georgian College – Barrie, Ontario – 2023-09 to 2025-04

Computer Engineering – DUOC UC – Santiago, Chile – 2013-03 to 2017-12

Analyst Programmer – DUOC UC – Santiago, Chile – 2013-03 to 2016-10

LANGUAGES

English – Professional Working Proficiency

Spanish – Native
